

Training Log — [SDIT]

Date: 12/13/2014

Duration: Vest - 20 minutes

Skills & Evaluation: (1 = unacceptable, 5 = acceptable but needs work, 10 = excellent)

Vest on/off, walking around - 5

INTRODUCED stairs - 5

Leash walking - (5)

Sit - 5

Notes:

He is more comfortable in the vest than the harness. I carried him down the stairs but he walked up calmly.

I put the Round leather collar on him - he's never worn one before. I think he needs to get used to slight pressure on his neck then he will be fine on the leash!

Sit - (5)

he quivered a bit at first but rode calmly for 15 minutes.

Date: 12/14

Duration: Leash walking - 5 minutes

CAR riding - 2 - 1 hr. Trips

Skills & Evaluation: (1 = unacceptable, 5 = acceptable but needs work, 10 = excellent)

~~Weinst~~

Leash walking - (5)

CAR riding - 5

Recall indoors - (10)

indoors
Recall - 15 reps. at
intervals

NAME Recognition - often

NAME Recognition - (10)

Notes:

He is starting to understand the Leash. When he stops I wait, give a very gentle leash vibration + let pat + "Let's go", he follows right along.

I carried him into the car - he rode quietly, waited for 2 hours with Oboe, I checked on him twice - Rode home calmly. I think he was happily surprised to see that we came back! He really likes it here!

Indoor recall - he comes running when I call from another room - wow - he has learned his NAME*
